Application and essay required. (2019 essay: Today's independent dealer faces unique challenges. Boutique or niche dealerships, which specialize in selling a category of vehicle to a more targeted buyer, are becoming more popular. For example, a dealership might specialize in selling lifted trucks and SUVs, German sedans or sedans under \$10,000. These highly focused operations have their pros and cons compared to the more general model practiced for decades that consists of carrying a mix of categories in higher demand, such as 50% cars, 25% trucks, 15% trucks and 10% minivans. If you had the operating capital to open your own dealership, what model would you create and why? How would your market size, target demographic, gross margin potential and advertising support that decision? "
